BUSINESS REVIEW

2006 was another successful year for Kingboard Chemical Holdings Limited (the "Group"). Benefited from the buoyant global economy, the Group's three core businesses, namely, laminate, chemical and printed circuit board ("PCB") had continued to enjoy strong growth. The Group achieved record revenue and profit for the fourth year in a row with consolidated sales reaching HK\$16.8 billion which was 28% higher than that of the previous year. The Group's earnings before interest and tax (excluding the gain from the spin off of laminate business and discount on acquisition) exceeded HK\$3,028.8 million which was 47% higher than the previous year.

Beyond the delivery of a solid financial performance, the Group reached another milestone following the spin off of the laminate business under the name Kingboard Laminates Holdings Limited ("Kingboard Laminates") on the main board of The Stock Exchange of Hong Kong Limited (the "Stock Exchange") on 7 December 2006. The separate listing of Kingboard Laminates would enable investors to appraise and assess the potential and performance of the respective business units distinctly within the Group. In addition, the success of the initial public offering of Kingboard Laminates enables it to access to the international capital markets so as to capture additional growth opportunities as they arise. With a strong balance sheet, the Group is in a better position than it has ever been to seize future growth opportunities for both PCB and chemical divisions.

CHAIRMAN'S STATEMENT

主席報告

Performance

We reported excellent results for 2006. Given our persistent focus on capacity growth and capability upgrading in the last few years, the Group had successfully ridden on the robust global demand for the consumer electronics product. Being the largest laminate producer in the world, the Group was able to take full advantage of its vertically integrated business model with a competitive cost structure to continuously gain share in the global laminate market. As a result, revenue (including inter-segment sales) for the laminate division recorded a 40% growth to HK\$8,243.3 million. Earnings before interest and tax ("EBIT") rose even higher by 48.5% to HK\$1,807.4 million over previous year. Volume sales were up by around 14% with the average monthly shipment reaching 7.3 million square meters. Revenue growth had outpaced volume growth because of tight supply of upstream raw materials which resulted in higher average selling price of laminate in the year. In addition, the capacity expansion located in Fogang, Guangdong province with lower operational cost base had contributed positively to our margin expansion.

業務表現

集團在二零零六年取得輝煌業績。由於集團在過去數年一直專注於擴大產能及提升生產技能，故此能成功受惠於全球電子消費品的強勁需求。集團作為全球最大覆銅面板生產商，能有效利用垂直整合經營模式的優勢及具競爭力的成本架構於環球覆銅面板市場搶佔市場份額。故此，覆銅面板部門的營業額（包括分部間之銷售）較上年度增加40%至八十二億四千三百三十萬港元，未扣除利息及稅項之盈利更較上年度大幅上升48.5%。

LIQUIDITY AND CAPITAL RESOURCES

The Group's consolidated financial position changed distinctly following the successful listing of Kingboard Laminates on the Stock Exchange on 7 December 2006. The Group received net proceeds of approximately HK\$6 billion from the spin off exercise of Kingboard Laminates. In addition, the Group received about HK\$854.6 million from the conversion of around 42.7 million warrants to new shares of the Company. As a result, the Group had net cash of HK\$715 million as at 31 December 2006 which was contrary to last financial year's net gearing ratio (ratio of interest bearing borrowings net of cash to total equity) of 58%. Furthermore, the retained group (excluding Kingboard Laminates and Elec & Eltek International Company Limited) was at a net cash position of HK\$3,060.3 million.

流動資金及財務狀況

集團在二零零六年十二月七日成功分拆旗下建滔積層板在聯交所主板上市後，綜合財政狀況出現重大變化。集團透過分拆建滔積層板上市，取得集資淨額約六十億港元。此外，本公司因認股權證獲行使而發行四千二百七十萬股新股，所得款項約為八億五千四百六十萬港元。因此，集團於二零零六年十二月三十一日擁有淨現金七億一千五百萬港元，有別於上財政年度58%

CHAIRMAN'S STATEMENT

主席報告

The net working capital cycle improved from 103 days as at 31 December 2005 to 96 days as at 31 December 2006 on the following key metrics:

- Inventories, in terms of stock turnover days, increased to 73 days as a result of more raw material being purchased for the expanded production capacity across the core businesses (31 December 2005 – 66 days)
- Trade receivables, in terms of debtors turnover days, improved to 97 days (31 December 2005 – 106 days)
- Trade and bills payable, in terms of creditors turnover days, improved to 74 days (31 December 2005 – 69 days)

As at 31 December 2006, net current assets and current ratio of the Group were HK\$9,467.1 million (31 December 2005 – HK\$2,857.3 million) and 2.90 (31 December 2005 – 1.56), respectively. The mix of bank borrowings between short term and long term bank borrowings stood at 24%:76% (31 December 2005 – 33%:67%). Around 2% of the bank borrowings was denominated in Renminbi and the rest in Hong Kong or US dollars.

Our recurrent operating cash inflow was strong and positive even after funding working capital requirement, capital expenditure and payment of interest and tax during the year. In 2006, the Group had invested HK\$2,393.2 million in new production facilities across core businesses so as to ride on new business opportunities.

The Group continued to adopt prudent financial management policy including the use of interest rate swap contract to minimize the exposure to fluctuation in interest rates movement. There is no material foreign exchange exposure to the Group during the year under review. The Group's revenue, mostly dominated in Hong Kong dollars, Renminbi and US dollars, was fairly matched with the currency requirement of operating expenses.

淨營運資金週轉期由二零零五年十二月三十一日的103日,改善至二零零六年十二月三十一日的96日,細分如下:

- 由於各個核心業務均擴大了生產能力,原材料採購亦隨之增加,存貨週轉期略為延長至73日(二零零五年十二月三十一日:66日)
- 貿易應收款項的週轉期改善至97日(二零零五年十二月三十一日:106日)
- 貿易及票據應付帳款的週轉期改善至74日(二零零五年十二月三十一日:69日)

於二零零六年十二月三十一日,集團流動資產淨值為九十四億六千七百一十萬港元(二零零五年十二月三十一日:二十八億五千七百三十萬港元),流動比率則為2.90(二零零五年十二月三十一日:1.56),短期與長期借貸的比例為24%:76%(二零零五年十二月三十一日:33%:67%)。集團的借貸約有2%以人民幣訂立,其餘的則以港元或美元訂立。

集團的經常性營運現金流在扣除營運資金、資本性開支以及支付利息及稅項後,依然錄得正數,表現強勁。集團於二零零六年投資了二十三億九千三百二十萬港元,為各個核心業務添置新的生產設施,迎新商機。

集團繼續採取穩健的財務政策,包括利用利率掉期合約,以減低利率波動所帶來的風險。在回顧年度內,集團並無面對重大的外匯風險。集團的收入主要以港元、美元及人民幣結算,與營運開支的貨幣要求比例大致相符。

HUMAN RESOURCES

As at 31 December 2006, the Group had a global workforce of over 42,900 (31 December 2005 – 37,600). The increase in headcount was in line with our ongoing expansion blueprint. Other than offering competitive salary package, the Group grants share options and discretionary bonuses to eligible employees based on our financial achievement and individual's performance.

PROSPECTS

Our remarkable operating performance has put the Group in an excellent position to invest in future earnings growth. Nevertheless, the Group is not complacent and will continue its relentless effort on cost management and efficiency improvements.

人力資源

截至二零零六年十二月三十一日,集團在全球合共聘用員工約42,900人(二零零五年十二月三十一日:37,600人),員工人數增加主要為配合集團業務擴展之步伐。集團除了提供具競爭力的薪酬待遇外,亦會根據公司的財政狀況和個別員工的表現,發放優先購股權及特別獎金予合資格員工。

前景

集團卓越的營運表現,使集團處於一個極有利的位置去部署未來的盈利增長。管理層並不會因此而自滿,並將繼續專注於加強成本管理及改善營運效率。

Our Chairman, Mr. Cheung Kwok Wing, was the winner of the DHL/SCMP Hong Kong Business Award, accredited with the Owner-Operator Award in 2006.

CHAIRMAN'S STATEMENT

主席報告

After some brief softness in demand for laminates at the start of 2007 due to seasonal effect of Chinese Lunar New Year, our laminate order book has picked up since March 2007 and our plants are operating near full capacity. The Group plans to further expand production capacity of laminates and upstream component materials so as to increase our market share and capture new business opportunities in the global market place. Our plant expansion in Fogang, Guangdong province and Jiangyin, Jiangsu province would increase the glass epoxy laminate monthly production capacity by 29% by the end of 2007.

For the PCB division, management experienced slower market demand from the computer and peripherals segment over the first two months of 2007 due to post-festival inventory correction while demand from other business segments remained healthy. Although the Group enjoys a significant presence in the single side to 6-layer count product segment, we are now proactively planning to extend our core competence into the higher profit margin product segment including HDI and higher layer count PCB. We plan to expand our multi-layer PCB production capacity by about 20% in 2007. The co-operation and alliance of different PCB shops within the Group, among others, will remain one of the key objectives to move forward.

受農曆新年假期的季節性影響，覆銅面板需求在二零零七年頭兩個月略為放緩，然而訂單自二零零七年三月已重上軌道，而集團各廠之產能亦已接近飽和。集團計劃進一步擴大覆銅面板以至上游物料的產能，藉此擴大集團的市場佔有率，捕捉全球市場之商機。集團在廣東省佛岡及江蘇省江陰的擴展計劃，預期可在二零零七年底額外增加環氧玻璃纖維覆銅面板產能29%。

印刷線路板方面，電腦及電腦周邊產品市場需求在過去兩個月因節日後的庫存調整而出現放緩現象，而其他行業市場的需求則依然保持穩健。雖然印刷線路板部門在單面至六層印刷線路板產品市場享有顯著地位，管理層現正積極擴展邊際利潤較高的高精密度及多層數的印刷線路板市場，並計劃在二零零七年內擴大多層線路板的產能約20%。聯盟整合旗下不同的印刷線路板廠將仍是集團未來的其中一個重要目標。

The phenol/acetone plant in Huizhou, Guangdong province further enhances our vertical integration development. 位於廣東省惠州之苯酚及丙酮廠，進一步提升集團之垂直整合發展。

CHAIRMAN'S STATEMENT

主席報告

The Group will continue to expand the chemical division. The methanol project in Chongqing has progressed smoothly and expects to be completed by end of 2007 which will provide an additional methanol output of 37,500 tonnes per month. The other two joint venture methanol projects in Shanxi province will add another 16,700 tonnes monthly production by first half of 2008. With the huge success of phase one of the coke/methanol plant in Hebei province, we have recently commenced construction of phase two with similar production capacity as phase one and expect it to be operational in 2008. To capitalize on the lower cost structure of caustic soda plant in Hengyang, Hunan province, capacity expansion is underway with a targeted completion date by the first half of 2008. In addition, the phenol/acetone plant in Huizhou, Guangdong province shall commence operation in year 2007. With all these chemical expansion projects coming on stream, the Group is well poised to seize further growth opportunities in the chemical division which will contribute greater value to the Group.

Goodwill (continued)

Capitalised goodwill arising on an acquisition of a subsidiary is presented separately in the consolidated balance sheet.

For the purposes of impairment testing, goodwill arising from an acquisition is allocated to each of the relevant cash-generating units, or groups of cash-generating units, that are expected to benefit from the synergies of the acquisition. A cash-generating unit to which goodwill has been allocated is tested for impairment annually, and whenever there is an indication that the unit may be impaired. For goodwill arising on an acquisition in a financial year, the cash-generating unit to which goodwill has been allocated is tested for impairment before the end of that financial year. When the recoverable amount of the cash-generating unit is less than the carrying amount of the unit, the impairment loss is allocated to reduce the carrying amount of any goodwill allocated to the unit first, and then to the other assets of the unit pro rata on the basis of the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in the consolidated income statement. An impairment loss for goodwill is not reversed in subsequent periods.

On subsequent disposal of a subsidiary, the attributable amount of goodwill capitalised is included in the determination of the amount of profit or loss on disposal.

Investment properties

On initial recognition, investment properties are measured at cost, including any directly attributable expenditure. Subsequent to initial recognition, investment properties are measured using the fair value model. Gains or losses arising from changes in the fair value of investment properties are included in profit or loss for the period in which they arise.

Properties, plant and equipment

Properties, plant and equipment (other than properties, plant and equipment under construction) used in the production or supply of goods or services, or for administrative purposes, are stated in the consolidated balance sheet at cost less subsequent accumulated depreciation and any accumulated impairment losses.

Depreciation is provided to write off the cost of items of properties, plant and equipment other than the properties, plant and equipment under construction over their estimated useful lives and after taking into account of their estimated residual value, using the straight-line method, at the following rates per annum:

Properties, plant and equipment under construction, representing property, plant and equipment in the course of construction for production or for its own use purposes, are carried at cost less any recognised impairment loss. Properties, plant and equipment under construction is classified to the appropriate category of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in the consolidated income statement in the year in which the item is derecognised.

Leasehold land and buildings under development for future owner-occupied purpose

When the leasehold land and buildings are in the course of development for production, rental or for administrative purposes, the leasehold land component is classified as a prepaid lease payment and amortised over a straight-line basis over the lease term. During the construction period, the amortisation charge provided for the leasehold land is included as part of costs of buildings under construction. Buildings under construction are carried at cost, less any identified impairment losses. Depreciation of buildings commences when they are available for use (i.e. when they are in the location and condition necessary for them to be capable of operating in the manner intended by management).

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost comprises direct materials and, where applicable, direct labour costs and overheads that have been incurred in bringing the inventories to their present location and condition. Cost is calculated using the weighted average method. Net realisable value represents the estimated selling price less all estimated costs of completion and costs to be incurred in marketing, selling and distribution.

Intangible assets

Intangible assets acquired separately

Intangible assets acquired separately and with finite useful lives are carried at costs less accumulated amortisation and any accumulated impairment losses. Amortisation for intangible assets with finite useful lives is provided on a straight-line basis over their estimated useful lives.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the consolidated income statement when the asset is derecognised.

Research and development expenditure

Expenditure on research activities is recognised as an expense in the period in which it is incurred.

An internally-generated intangible asset arising from development expenditure is recognised only if it is anticipated that the development costs incurred on a clearly-defined project will be recovered through future commercial activity. It will be recognised as an intangible asset if, and only if, the following criteria are met: (i) the asset is identifiable; (ii) the asset is separable, or arises from contractual or other legal rights; (iii) the asset is expected to generate probable future economic benefits; and (iv) the cost of the asset can be measured reliably. The cost of an internally-generated intangible asset is the expenditure incurred from the date when the asset first meets the recognition criteria, less any accumulated amortisation and impairment losses. Amortisation is provided on a straight-line basis over the asset's estimated useful life.

Intangible assets (continued)

The amount initially recognised for internally-generated intangible asset is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria. Where no internally generated intangible asset can be recognised, development expenditure is charged to profit or loss in the period in which it is incurred.

Subsequent to initial recognition, internally-generated intangible asset is reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets acquired separately.

Impairment

Intangible assets with finite useful lives are tested for impairment when there is an indication that an asset may be impaired (see the accounting policies in respect of impairment losses for tangible and intangible assets below).

Impairment losses (other than goodwill (see the accounting policies in respect of goodwill))

At each balance sheet date, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognised as an expense immediately.

Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised as income immediately.

Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

The Group as lessor

Rental income from operating leases is recognised in the consolidated income statement on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised as an expense on a straight-line basis over the lease term.

The Group as lessee

Rentals payable under operating leases are charged to profit or loss on a straight-line basis over the term of the relevant lease. Benefits received and receivable as an incentive to enter into an operating lease are recognised as a reduction of rental expense on a straight-line basis over the term of the relevant lease.

The land and building elements of a lease of land and building are considered separately for the purpose of lease classification, leasehold land which title is not expected to pass to the lessee by the end of the lease term is classified as an operating lease unless the lease payments cannot be allocated reliably between the land and building elements, in which case, the entire lease is classified as a finance lease.

Foreign currencies

In preparing the financial statements of each individual group entity, transactions in currencies other than the functional currency of that entity (foreign currencies) are recorded in the respective functional currency (i.e. the currency of the primary economic environment in which the entity operates) at the rates of exchange prevailing on the dates of the transactions. At each balance sheet date, monetary items denominated in foreign currencies are retranslated at the rates prevailing on the balance sheet date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences arising on the settlement of monetary items, and on the translation of monetary items, are recognised in profit or loss in the period in which they arise, except for exchange differences arising on a monetary item that forms part of the Group's net investment in a foreign operation, in which case such exchange differences are recognised in equity in the consolidated financial statements. Exchange differences arising on the retranslation of non-monetary items carried at fair value are included in profit or loss for the period except for differences arising on the retranslation of non-monetary items in respect of which gains and losses are recognised directly in equity, in which cases, the exchange differences are also recognised directly in equity.

Financial assets

The Group's financial assets are classified into (i) financial assets at fair value through profit or loss, (ii) loans and receivables and (iii) available-for-sale financial assets. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace. The accounting policies adopted in respect of each category of financial assets are set out below.

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss has two subcategories, including financial assets held for trading and those designated at fair value through profit or loss on initial recognition.

At each balance sheet date subsequent to initial recognition, financial assets at fair value through profit or loss are measured at fair value, with changes in fair value recognised directly in profit or loss in the period in which they arise.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. At each balance sheet date subsequent to initial recognition, loans and receivables (including trade and other receivables and bank balances) are carried at amortised cost using the effective interest method, less any identified impairment losses. An impairment loss is recognised in profit or loss when there is objective evidence that the asset is impaired, and is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate. Impairment losses are reversed in subsequent periods when an increase in the asset's recoverable amount can be related objectively to an event occurring after the impairment was recognised, subject to a restriction that the carrying amount of the asset at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

Financial liabilities and equity instruments issued by a group entity are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

The Group's financial liabilities are generally classified into financial liabilities at fair value through profit or loss and other financial liabilities. The accounting policies adopted in respect of financial liabilities and equity instruments are set out below.

Derivative financial instruments and hedging

Derivatives are initially recognised at fair value at the date a derivative contract is entered into and are subsequently remeasured to their fair value at each balance sheet date. The resulting gain or loss is recognised in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship.

Derivatives that do not qualify for hedge accounting are deemed as financial assets held for trading or financial liabilities held for trading.

The Group designates certain derivatives as hedges of the cash flow of floating-rate bank borrowings (i.e. interest rate swaps).

Hedge accounting

The Group designates certain derivatives as hedging instruments as cash flow hedges.

At the inception of the hedge relationship the entity documents the relationship between the hedging instrument and hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Group documents whether the hedging instrument that is used in a hedging relationship is highly effective in offsetting changes in fair values or cash flows of the hedged item.

Cash flow hedge

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges are deferred in equity. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss as part of other expenses or other income.

Amounts deferred in equity are recycled in profit or loss in the periods when the hedged item is recognised in profit or loss.

Hedge accounting is discontinued when the Group revokes the hedging relationship, the hedging instrument expires or is sold, terminated, or exercised, or no longer qualifies for hedge accounting. Any cumulative gain or loss deferred in equity at that time remains in equity and is recognised when the forecast transaction is ultimately recognised in profit or loss. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was deferred in equity is recognised immediately in profit or loss.

Derecognition

Financial assets are derecognised when the rights to receive cash flows from the assets expire or, the financial assets are transferred and the Group has transferred substantially all the risks and rewards of ownership of the financial assets. On derecognition of a financial asset, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised directly in equity is recognised in profit or loss.

Financial liabilities are derecognised when the obligation specified in the relevant contract is discharged, cancelled or expires. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

5. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (continued)

Market risk (continued)

(ii) Cash flow interest rate risk

The Group's cash flow interest rate risk relates primarily to floating-rate bank borrowings (see Note 30 for details of these borrowings). In relation to these floating-rate borrowings, the Group aims at keeping certain borrowings at fixed rates. In order to achieve this result, the Group entered into interest rate swaps to hedge against part of its exposure to potential variability of cash flows arising from changes in floating rate (see Note 23 for details). The management continuously monitors interest rate fluctuation and will consider further hedging interest rate risk should the need arises.

The Group's bank balances have exposure to cash flow interest rate risk due to the fluctuation of the prevailing market interest rate on bank balances. The directors consider the Group's exposure of the short-term bank deposits to interest rate risk is not significant as interest bearing bank balances are within short maturity period.

(iii) Fair value interest rate risk

The Group is exposed to fair value interest rate risk from the fixed rate debt securities (see Note 22 for details). However, the management considered the risk is insignificant to the Group.

(iv) Equity price risk

The Group is exposed to equity price risk. The management manages this exposure by maintaining a portfolio of investments with different risk profiles.

5. 財務風險管理目標及政策(續)

市場風險(續)

(ii) 現金流量利率風險

本集團之現金流量利率風險主要涉及以浮動利率計息之銀行借貸(該等借貸詳情見附註30)。就該等浮動利率借貸而言,本集團致力將若干借貸利率保持穩定。為達致此目的,本集團訂立利率掉期安排,以對沖因浮動利率變動而產生之現金流量潛在變動(詳情見附註23)。管理層持續監控利率波動,並將於有需要時考慮進一步對沖利率風險。

由於適用於銀行結餘之現行市場利率浮動,本集團之銀行結餘承受現金流量利率風險。董事認為,由於計息銀行結餘之到期期間較短,故本集團短期銀行存款所承受之利率風險並不重大。

(iii) 公平值利率風險

本集團須承受由定息債務證券所產生之公平值利率風險(詳情見附註22)。然而,管理層認為此項風險對本集團而言並不重大。

(iv) 股本價格風險

本集團須承受股本價格風險。管理層藉持有不同風險之投資組合管理此類風險。

5. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (continued)

Credit risk

The Group's maximum exposure to credit risk in the event of the counterparties' failure to perform their obligations at 31 December 2006 in relation to each class of recognised financial assets is the carrying amount of those assets as stated in the consolidated balance sheet. In order to minimise the credit risk, the management of the Group has delegated the members of the board of directors responsible for determination of credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Group reviews the recoverable amount of each individual trade debt at each balance sheet date to ensure that adequate impairment losses are made for irrecoverable amounts. In this regard, the directors of the Company consider that the Group's credit risk is significantly reduced.

The credit risk for bank deposits and bank balances exposed is considered minimal as such amounts are placed with banks with good credit ratings.

The Group has no significant concentration of credit risk, with exposure spread over a number of counterparties and customers.

Fair value

The fair value of financial assets and financial liabilities are determined as follows:

- the fair value of financial assets and financial liabilities with standard terms and conditions and traded on active liquid markets are determined with reference to quoted market bid prices; and
- the fair value of derivative instruments are determined in accordance with generally accepted pricing models.

The directors consider that the carrying amounts of financial assets and financial liabilities recorded at amortised cost in the consolidated financial statements approximate their fair values.

5. 財務風險管理目標及政策(續)

信貸風險

倘交易方於二零零六年十二月三十一日未能履行彼等就各類已確認財務資產之承擔,則本集團須承受之最高信貸風險為於綜合資產負債表所載資產賬面金額。為將信貸風險降至最低,本集團管理層已委派董事會成員負責制訂信貸限額、信貸審批及其他監控程序,以確保採取跟進措施收回逾期未付之債項。此外,於各結算日,本集團檢討每項個別應收貿易賬款之可收回金額,以確保:

20. GOODWILL (continued)

Particulars regarding impairment testing on goodwill arising from acquisition of subsidiaries are disclosed as follows:

As explained in Note 7, the Group uses business segments as its primary segment for reporting segment information. For the purposes of impairment testing, goodwill has been allocated to the cash generating unit ("CGU") of PCBs business segment. The carrying amount of goodwill allocated to the CGU of PCBs business segment is approximately HK\$1,717,519,000 (2005: HK0.0177 1Ji9,354,000).

The recoverable amount of the PCB' determined from value-in-use calculation. Goodwill is expected to generate cash flow for indefinite period. To calculate this, cash flow projections are based on five year periods financial budgets approved by senior management. The key assumption for the value-in-use calculation is the budgeted gross margin at a discount rate of 7% and growth rate of 10%, which is determined based on the unit's past performance and management's expectations for the market development. Management believes that any reasonably possible change in any of these assumptions would not cause the aggr carrying amount to exceed the aggregate recoverable amount. Since the recoverable amount of the cash generating unit is higher than its carrying amount, the directors consider that the carrying value of goodwill at the balance sheet date is not significantly impaired.

20. 商譽(續)

有關收購附屬公司所產生之商譽之減值測試詳情披露如下:

誠如附註7所闡釋,本集團以業務分部作為申報分部資料之主要分部。就減值測試而言,商譽已分配予印刷線路板業務分部之現金產生單位(「現金產生單位」),分配予印刷線路板業務分部之現金產生單位之商譽賬面值約為1,717,519,000港元(二零零五年: 11Ji9,354,000港元)。

印刷線路板現金產生單位之可收回金額按使用價值計算法釐定。預期商譽將無限期產生現金流量。為計算使用價值,現金流量預測以經高級管理層所批准之五年期財政預算為基準。使用價值計算法之主要假設為預算毛利率之折現率及增長率分別為7%及10%,乃按該單位過往表現及管理層對市場發展之期望釐定。管理層相信,該等假設或

The above unlisted investments represent investments in unlisted equity securities issued by private entities. They are measured at cost less impairment at each balance sheet date because the range of reasonable fair value estimates is so significant that the directors are of the opinion that their fair values cannot be measured reliably.

The Group currently uses interest rate swaps to minimise its exposure to cash flow changes of its floating-rate Hong Kong dollar bank borrowings by swapping borrowings from floating rates to fixed rates. The critical terms of these interest rate swaps are similar to those of the hedged bank borrowings and the directors designated the derivatives as cash flows hedging instruments and considered they are highly effective.

During the year ended 31 December 2006, the loss on fair value change of approximately HK\$73,370,000 (2005: gain on fair value change of approximately HK\$206,988,000) has been deferred in equity.

本集團透過將借貸由浮息轉為定息，利用利率掉期減低按浮息計算之港元銀行借貸現金流量變動之風險。該等利率掉期之主要條款與對沖銀行借貸之主要條款相似，董事指定該衍生工具為現金流量對沖工具，並認為該等工具極有效。

截至二零零六年十二月三十一日止年度，為數約73,370,000港元之公平值變動虧損（二零零五年：公平值變動收益約206,988,000港元）已於股本遞延處理。

23. DERIVATIVE FINANCIAL INSTRUMENTS

(continued)

In December 2006, the Group repaid all floating-rate Hong Kong dollar bank borrowings, which were effectively hedged by the interest rate swaps. However, the Group did not terminate those interest rate swaps at the same time. As a result, the hedging accounting was discontinued and the credit balance of approximately HK\$43,823,000 included in the hedging reserve was released to the consolidated income statement during the year ended 31 December 2006.

At the balance sheet date, major terms of the interest rate swaps are as follows:
